Inledning

I 2016 års upplaga av *Den svenska handelsflottan* redovisas fartyg med minst 300 GT, minst 500 GT och minst 1000 GT. En sådan redovisning underlättar jämförelser med andra länder och med statistik från andra källor. Vidare har fartyg som inte är rena last- eller passagerarfartyg i flera fall särredovisats under "Miscellaneous" (t ex bogserbåtar, isbrytare, hotellfartyg), även detta för att underlätta jämförelser.

Med begreppet den svenska handelsflottan avses här fartyg med svensk flagg eller fartyg ägda av svenska intressen (eller båda).

I de fall annat inte anges, avser uppgifter i text och tabeller det aktuella läget 2016-01-01.

Källa till uppgifterna i denna rapport är – om inte annat anges – en databas över världshandelsflottan producerad av *Clarkson Research*. Den läsare som är bekant med databasen sedan tidigare, ska märka att kategoriindelningen i rapporten skiljer sig från Clarksons. Tabell I visar hur vi har gjort.

Sammanfattning

Den svenska handelsflottan

Den svenska handelsflottan består av 465 fartyg med minst 300 GT, varav 190 med svensk flagg och 275 med utländsk flagg. Om man räknar bort de fartyg som i de statistiska sammanställningarna betecknas "Miscellaneous" består den svenska handelsflottan med minst 300 GT av 416 fartyg, varav 151 med svensk flagg och 265 med utländsk flagg (se Tabell 1d & Tabell 1e).

Den svenska handelsflottan består av 408 fartyg med minst 500 GT, varav 141 med svensk flagg och 267 med utländsk flagg. Om man räknar bort de fartyg som i de statistiska sammanställningarna betecknas "Miscellaneous" består den svenska handelsflottan med minst 500 GT av 384 fartyg, varav 124 med svensk flagg och 260 med utländsk flagg (se Tabell 2d & Tabell 2e).

Den svenska handelsflottan består av 381 fartyg med minst 1000 GT, varav 116 med svensk flagg¹ och 265 med utländsk flagg. Om man räknar bort de fartyg som i de statistiska sammanställningarna betecknas "Miscellaneous" består den svenska handelsflottan med minst 1000 GT av 365 fartyg, varav 107 med svensk flagg och 258 med utländsk flagg (se Tabell 3d & Tabell 3e).

Den svenska handelsflottan med minst 300 GT har en sammanlagd dödvikt (dwt) på 7,4 miljoner ton, ett sammanlagt GT på 7,9 miljoner ton, och ett sammanlagt NT på 3,3 miljoner ton (se Tabell 1d).

Den svenska handelsflottan med minst 500 GT har en sammanlagd dödvikt (dwt) på 7,4 miljoner ton, ett sammanlagt GT på 7,8 miljoner ton, och ett sammanlagt NT på 3,3 miljoner ton (se Tabell 2d).

Den svenska handelsflottan med minst 1000 GT har en sammanlagd dödvikt (dwt) på 7,4 miljoner ton, ett sammanlagt GT på 7,8 miljoner ton, och ett sammanlagt NT på 3,3 miljoner ton (se Tabell 3d).

Den svenskflaggade handelsflottan

Antalet svenskflaggade fartyg utgör 41 % av den totala svenska handelsflottan med minst 300 GT. Motsvarande siffror är, beräknat efter dödvikt 20 %, GT 34 % och NT 33 % (se Tabell 1d).

Vanligast förekommande flagg

De fem mest använda flaggorna räknat i dödvikt är i fallande ordning: Bermuda, Sverige, Storbritannien, Norge (Nis) och Liberia (se Tabell 4a).

¹ De svenskflaggade fartygen med minst 1000 GT är i huvudsak de som erhåller sjöfartsstöd enligt SFS 2001:770.

De sex mest använda flaggorna räknat i antal fartyg är i fallande ordning: Sverige, Nederländerna, Norge (Nis), Storbritannien samt Bermuda och Danmark (Dis) (se Tabell 4a).

Åldersstruktur

Medelåldern på den svenska handelsflottan med minst 300 GT är 20,7 år. Om man viktar utifrån fartygens dödvikt blir medelåldern 12,0 år. Medelåldern på den svenskflaggade delen av handelsflottan med minst 300 GT är 27,5 år, medan den viktade medelåldern ligger på 16,9 år. Motsvarande siffror för de utländskt flaggade fartygen är 16,0 år respektive 10,7 år (se Tabell 5a).

Utvecklingen av svenskflaggade fartyg

Antalet svenskflaggade fartyg har trendmässigt minskat. Tabellen nedan visar utvecklingen av svenskflaggade fartyg med sjöfartsstöd.

Anmärkning: Fartyg för vilka sjöfartsstöd utgått under någon del av respektive år. Det nuvarande formatet på det svenska sjöfartsstödet infördes i oktober 2001 (med vissa förändringar från 1 juni 2014).

Tabell II anger antalet fartyg för vilka stöd utgått under någon del av respektive år. Samma fartyg kan alltså förekomma mer än ett år. Samtidigt: under åren 2002-2015 har 416 fartyg erhållit stöd (Delegationen för Sjöfartsstöd).²

Anmärkning: Ovägd medelålder är detsamma som ”vanligt” medelvärde, d.v.s. inom varje kategori har fartygens ålder först summerats, och därefter dividerats med antalet fartyg. Med vägd medelålder menas att värdet är viktat efter dödvikt. Nyare fartyg har generellt högre dödvikt, varför de vägda snittvärdena alla är lägre än de ovägd.

Appendix B: Sjöfartsstöd

Metodproblem

Detta appendix bygger på rådata från Delegationen för Sjöfartsstöd (Tabell B1 är en bearbetning endast till formen). Delegationen för Sjöfartsstöd anger antalet fartyg för vilka stöd utgått under någon del av ett kalenderår. Fartygen indentifieras med en signalbeteckning och ett fartygsnamn.

Den som läser Tabell B1 noggrant ska finna något som möjligen är överraskande: ett fartygsnamn kan vara kopplat till mer än en signalbeteckning. Och omvänt, en signalbeteckning kan vara kopplad till mer än ett fartygsnamn. Tre tänkta – men högst realistiska – exempel får illustrera:

Exempel 1: Ett fartygsnamn, mer än en signalbeteckning

År 0		År 1	År 1	
<u>Signal</u>	<u>Namn</u>	<u>Händelse</u>	<u>Signal</u>	<u>Namn</u>
ABC	Fenix	Fartyget skrotas, samma rederi sätter in nytt fartyg med gamla namnet	XYZ	Fenix

I exemplet sker bytet samma år, och detta förklarar varför ett och samma fartygsnamn kan dyka upp två gånger ett visst år i sjöfartsstödsstatistiken.

Exempel 2: En signalbeteckning, mer än ett fartygsnamn

År 0		År 1	År 6	
<u>Signal</u>	<u>Namn</u>	<u>Händelse</u>	<u>Signal</u>	<u>Namn</u>
AAA	Astoria	Fartyget avregistreras	AAA	Svea

När ett fartyg avregistreras återanvänds signalbeteckningen. Oftast sker detta inte förrän fem år efter avregistreringen (Sjöfartsregistret).

Exempel 3: En signalbeteckning, mer än ett fartygsnamn

År 0		År 1	År 1	
<u>Signal</u>	<u>Namn</u>	<u>Händelse</u>	<u>Signal</u>	<u>Namn</u>
ÅÄÖ	Maria	Fartyget byter ägare	ÅÄÖ	Bodil

Fartygsnamnet *kan* ändras vid ägarbyte (i exemplet antar vi att så är fallet). Signalbeteckningen kvarstår emellertid (Sjöfartsregistret).

Det metodiska problemet är följande: ska vi använda signalbeteckning eller fartygsnamn, för att ta reda på antalet fartyg som fått stöd?

Exempel 1 talar för signalbeteckning; exempel 2 istället för fartygsnamn. Den *unika kombinationen* av signalbeteckning och fartygsnamn fungerar dock i båda exemplen (vi kommer då att dra slutsatsen att fyra fartyg fått stöd, vilket är intuitivt rimligt).

Återstår exempel 3. Ett ägarbyte som också följs av ett namnbyte kommer att bilda en ny unik kombination. Men: det är knappast motiverat att räkna samma fartyg två gånger bara för att det fått ett nytt namn.

Tabell B1 redovisar de 415 unika kombinationerna av signalbeteckning och fartygsnamn, åren 2002-2014. Utifrån exempel 3 kan vi sluta oss till att detta innebär en viss överskattning av det antal fartyg som fått stöd. I Tabell B2 är alla dubletter listade. Då det exakta antalet fartyg som fått stöd under åren, inte låter sig beräknas med mindre än att namnbyten studeras för enskilda fartyg, kan den vetgirige läsaren själv göra en bedömning av storleken på överskattningen.

Tabell B3, slutligen, listar år för år de fartyg som fått stöd. (Tabellen ger samma information som Tabell B1; bara framställning skiljer dem åt.)
